

MRSA

The student must be screened for MRSA, before the start of his/her practice, if:

- The student has been a patient in a foreign hospital (during the past five years).
- The student has worked/practiced at a foreign hospital / medical care institution (during the past year).
- The student has worked at an MRSA endemic medical care institution (during the past year) in Finland.
- International students need to provide a recent result from a MRSA-screening before starting his/her practice, according to the criteria above.
