Welcome to Vaasa!

Did you know that every fifth of the 67 000 inhabitants in Vaasa is a student? Or that the largest energy technology cluster of the Nordic countries which is a major employer in the region is situated in Vaasa? You will become a part of a bigger student community consisting of six institutions of higher education and it is easy to find your place in the working life.

Bilingualism and multiculturalism play an active part in our urban lifestyle, which is absolutely an advantage for our region. There are also a lot of choices of leisure-time activities. The City of Vaasa is active in social media and offers you tips about current events.

” **Hello! Congratulations on your study place and welcome to the sunny Vaasa!** I have studied in Vaasa myself and noticed that the life of a student is pleasant here. The city is full of life and the distances are comfortably short.

Tomas Häyry, Mayor, City of Vaasa
